

# Lawrence University - Buchanan Kiewit Wellness Center | Feature Profile

## PROJECT

Combining student health and counseling services with recreational, leisure and fitness programs, The Buchanan Kiewit Wellness Center at Lawrence University underwent a renovation that now makes it a one-stop wellness resource facility. With an established relationship and admired performance, SignElements® was chosen to provide its architectural consultative and signage services for the renovated building.

## SOLUTION

With a vast range of project requests, the SignElements® team delivered an aesthetically creative package, including an updateable system that features photographs of campus athletes. The resulting total concept design package, from cabinetry to paint selections and signage to donor recognition, achieved the vision to create an environment that was vibrant and trendy while expressing campus activities for all visitors.
